Best find ever. I have celiac and have not eaten biltong in many years. Am I glad I came across this site. Their biltong is absolutely delicious and I will certainly be ordering more in the future.

Why Hunt & Gather?

Most packaged biltong today is made for shelf life, with preservatives, nitrites and unnecessary additives.

We looked back to ancient South African hunter gatherers who lived on simple, real food.
Meat. Plants. Fats. *Nothing artificial.*

Utzi personifies those ancient ways...

We make biltong the traditional way.
Only simple ingredients and fermented cultures.
No artificial preservatives, ever.
